WHO IS GESi®

The DPFXFIT™ Advantage: Why Our Program Works For You

- Complete line of aftermarket DPFs and DOCs designed as direct-fit OEM replacements
- All-makes coverage for light-, medium-, and heavy-duty applications
- Substrates sourced from Tier 1 OEM suppliers and coated in-house with precious metals
- One-piece canister construction using high-quality stainless steel
- All units include OEM clamps and gaskets
- Industry-leading packaging to ensure products arrive in the same condition in which they were shipped
- All units ship same day via prepaid 2-day service directly from one of our strategically located PDCs throughout North America
  - Drop-ship & flat-rate next-day air also available
- Always new, never re-manufactured, with no core charges
- All units come with a 3-year, unlimited-mileage warranty
- Full-line accessory program, including genuine OEM clamps, gaskets, and NOx sensors available for purchase
- Responsive customer service team with coast-to-coast support

Find Your OE Replacement Today

OEM DURABILITY & PERFORMANCE WITH AFTERMARKET AFFORDABILITY!

About Global Emissions Systems Inc. (GESi®)

Global Emissions Systems Inc. (GESi®) specializes in the design, engineering, and manufacturing of world-leading emission control technologies. With more than 25 years of industry experience, GESi® has invested extensively in the research, development, and testing of our advanced emission solutions for on-road, off-road, marine, and stationary applications. These products can be integrated at the time of manufacture or retrofitted into any existing engine installation.

The GESi® advantage is built on patented technology, North American manufacturing, and an unwavering commitment to quality, performance, and innovation. Our advanced aftertreatment solutions are designed to deliver significant emission reductions and have undergone verification or evaluation by leading independent third-party organizations, including CARB, EPA, ETV, and European programs.

Headquartered in Ontario, Canada, GESi® expanded its North American manufacturing capabilities into the United States in 2020 with the establishment of a coating facility just outside Charlotte, North Carolina. Through extensive vertical integration, we maintain control over key stages of production, including raw material sourcing, catalyst coating and final product integration/assembly, all translating to a cost-effective solution for our customers.

DPFXFIT™ by GESi® serves the heavy-duty diesel market with a comprehensive range of diesel particulate filters (DPFs) and diesel oxidation catalysts (DOCs) for light-, medium-, and heavy-duty trucks.

GESi® also delivers advanced emission control solutions for industrial and stationary power applications. Leveraging our extensive engineering expertise, we develop customized aftertreatment solutions tailored to specific engine platforms, operating conditions, and emission reduction requirements.

G-Sport™ by GESi® serves the high-performance automotive market with a complete line of universal, high-flow, EPA-compliant catalytic converters engineered for demanding, high-horsepower applications.

From high-performance automotive applications to heavy-duty diesel and industrial power generation, GESi® combines engineering expertise, proprietary technology, and vertically integrated manufacturing to deliver innovative, reliable, and cost-effective emission control solutions.

INSTALLATION & WARRANTY

PRE-INSTALLATION GUIDE

BEFORE YOU INSTALL YOUR DPF HAVE YOU CHECKED...?

1 VEHICLE INFORMATION
Confirm the basics before you begin

- Is the root cause of the emission component device known?
- Are there any active or pending ECM fault codes related to aftertreatment?
- Are there any upstream issues (fuel injector, fueling control, or balance faults) that could contribute to excessive soot loading?
- Has the vehicle duty cycle been reviewed and documented?
- Is there any evidence of uncontrolled, excessive, or repeated regeneration events?
- Are all exhaust gas sensors operating within normal parameters? If not, ensure all failed sensors been replaced prior to installation?
- Is the ECM software and calibration at the current OEM-approved level for this application?

2 VEHICLE COMPONENTS
Check the system for any existing issues

- Are there any modifications, deletions, or alterations to the aftertreatment or exhaust system?
- Are differential pressure lines/hoses properly connected?
- Are there any intake system or charge air cooler leaks?
- Is the EGR system operating correctly?
- Are there any liquids (fuel, oil, or coolant) present within the aftertreatment system?

3 INSTALLATION
Make sure everything is secure and sealed

- Are all mounting points properly supported, with no broken brackets or misalignment?
- Are all exhaust clamps, gaskets, sensors, and connections intact, properly installed, and sealing?

CHECK. CONFIRM. INSTALL. PERFORM.

WARRANTY PROCESS

CUSTOMER TO FOLLOW STEPS 1 TO 5 BELOW

1 IDENTIFY FAILURE MODE & CONFIRM COVERAGE
- Identify failure mode outlined in the DPFXFIT™ warranty booklet and confirm it is under the "What Is Covered" section of the warranty policy (the DPFXFIT™ warranty booklet can be found at: www.dpfxfit.com/resources).

2 PROVIDE PHOTO PROOF
- Please provide photo proof of the failure mode you are referencing within the DPFXFIT™ warranty booklet.

3 PROVIDE PROOF OF PURCHASE
- Provide the original purchase order or invoice number the unit was purchased under.

4 CONTACT GESi® CUSTOMER SERVICE
- Contact GESi® customer service including the above details to request a Return Merchandise Authorization (RMA) number.

5 SHIP PRODUCT BACK TO GESi®
- Customer to ship product back to GESi®. (at their expense)

6 INSPECTION & REVIEW
- Once the product is received, a GESi® representative will physically inspect all returned items to determine if claim is acceptable.

7 CREDIT & DISPOSITION
For all warrantable products, a credit will be applied to their account (within 30 days) for the original purchase price.

To reduce downtime, DPFXFIT™ strongly encourages ordering the replacement part at the time the issue is discovered. During the RMA process, if the unit is deemed warrantable, a credit will be issued to account, offsetting the new/ replacement unit purchase.

Complete details on the DPFXFIT™ program terms, conditions & warranty process can be found at: www.dpfxfit.com/resources

THE FUNCTION OF

DPF vs DOC

TWO CRITICAL COMPONENTS.
ONE CLEANER RESULT.

DPF

DIESEL PARTICULATE FILTER

FUNCTION

- A DPF utilizes a wall-flow filter to capture soot by forcing exhaust gases through the porous substrate walls, trapping solid soot particles, while allowing exhaust gases to pass through
- As soot accumulates, it is periodically burned off during a regeneration process, restoring the filter's capacity & efficiency

DOC

DIESEL OXIDATION CATALYST

FUNCTION

- A DOC utilizes a flow through substrate to convert harmful hydrocarbons (HC) and carbon monoxide (CO) emissions by oxidizing them within the catalyst
- Heat generated by the DOC is critical for initiating and sustaining passive regeneration within the DPF

BETTER TOGETHER

The DOC and DPF work together to reduce emissions, improve engine efficiency and keep your fleet compliant

Due to industry changes, modifications and/or consolidations to aftermarket and/or OEM designs, please double-check your cross reference at www.dpfxfit.com to ensure accuracy and that you are using the most current information

BETTER PERFORMANCE.
BETTER SERVICEABILITY.

- Serviceable units available with included V-band clamps for ongoing maintenance & cleanings
- Stainless steel construction, yet lighter weight than OEM

NOx SENSORS

NOx SENSORS

OEM ELECTRONICS + NGK CERAMIC SENSING TECHNOLOGY

ENGINEERED FOR COMMERCIAL VEHICLES

DPFXFIT™ is proud to offer OEM NOx sensors engineered for accurate, reliable, and consistent NOx measurement. Built with advanced OEM electronics, these sensors ensure dependable communication with the engine control system, supporting optimized SCR performance, precise DEF dosing, and effective emissions control.

WHY CHOOSE DPFXFIT™?

Heavy-Duty Durability:
Designed to withstand the demanding operating conditions of commercial vehicles, delivering reliable performance across a wide range of applications.

Direct-Fit Design & Broad Coverage:
Engineered for OEM-equivalent fit, function, and performance, with extensive coverage across leading truck and engine platforms.

Competitive Pricing:
Get OEM NOx sensor quality at a more competitive price, without the additional OEM core charge.

KEEP YOUR FLEET
MOVING.

FIND THE RIGHT SENSOR FOR YOUR APPLICATION AT
DPFXFIT.COM

@TeamGESiRacing
@KBTitanRacing

Eric Latino, Founder and CEO of Global Emissions Systems Inc. (GESi®), is a distinguished Canadian entrepreneur and accomplished drag racer whose career reflects a passion for automotive innovation, performance, and business leadership. From his early days as an automotive enthusiast to becoming a recognized figure in both the emissions-control industry and professional drag racing world, Eric has built a reputation for pushing boundaries and pursuing excellence.

Behind the wheel of the GESi® Chevrolet Camaro, Eric is an NHRA national record holder in the Pro Mod division and was inducted into the Canadian Drag Racing Hall of Fame in 2019. With a career-best elapsed time of 6.501 seconds, he has established himself as a formidable competitor in the sport.

In June 2023, Eric made his NHRA Pro Stock debut at the Summit Racing Equipment NHRA Nationals, becoming the first Canadian driver to compete in the class since the mid-2010s.

Eric's unique combination of entrepreneurial vision and motorsports experience has created opportunities to build meaningful partnerships and lasting industry relationships. By integrating GESi's business objectives into his racing program, he has successfully bridged the worlds of business and professional motorsports, leveraging the platform to strengthen the brand, grow strategic connections, and demonstrate GESi's commitment to innovation and performance both on and off the track.
