- ✘ COMPLETE LINE OF AFTERMARKET DPF AND DOCs DESIGNED AS AN OEM REPLACEMENT
- ✘ ALL MAKES COVERAGE FOR LIGHT, MEDIUM & HEAVY-DUTY APPLICATIONS
- ✘ SUBSTRATES SOURCED FROM TIER-1 OEM SUPPLIERS AND COATED IN-HOUSE WITH PLATINUM GROUP METALS
 - STRICT INTERNAL QUALITY CONTROL ENSURES ENTIRE SUBSTRATES ARE COMPLETELY COATED WITH PRECIOUS METALS
- ✘ ONE-PIECE CANISTER MADE FROM HIGH QUALITY STAINLESS STEEL
- ✘ ALL UNITS INCLUDE OEM QUALITY CLAMPS AND GASKETS
- ✘ 3-YEAR UNLIMITED MILEAGE WARRANTY
- ✘ INDUSTRY LEADING PACKAGING TO ENSURE PRODUCTS ARRIVE IN THE SAME CONDITION THEY WERE SHIPPED
- ✘ ALWAYS NEW, NEVER RE-MANUFACTURED WITH NO CORE CHARGES
- ✘ CLAMPS, GASKETS & SENSORS AVAILABLE
- ✘ PROVIDING QUICK TURNAROUND TIMES WITH A RESPONSIVE CUSTOMER SERVICE TEAM THAT OFFERS COAST TO COAST COVERAGE AND SUPPORT

OEM DURABILITY & PERFORMANCE WITH AFTERMARKET AFFORDABILITY!

North Carolina, 28166

About Global Emissions Systems Inc. (GESi®)

Global Emissions Systems Inc. (GESi®) specializes in the design, engineer, and manufacture of world-leading emission control technologies that are effective for any type of engine and work with all commercially available fuels. For the past 25 years, we have invested into the research, development, and testing of our advanced emission solutions for on-road, off-road, marine, and stationary applications. The GESi® advantage stands for North American built aftertreatment solutions with a focus on quality and performance and we are proud that our patented technologies help our partners to obtain the highest level of emission reductions. The GESi® technology has been verified by all major independent third-party labs including CARB, EPA, ETV, and EURO. Our products can be integrated at the time of manufacture or retrofitted into any existing engine installation. GESi® is headquartered out of Ontario, Canada, and in 2020 we expanded into the United States, opening our coating facility just outside Charlotte, North Carolina. At GESi®, we place an emphasis on vertical integration and manage everything from sourcing the finest raw materials to the production of final assembly, all of which translates into a more cost-effective solution for our customers.

For the automotive high-performance market, we sell under our brand G-Sport™ by GESi®, which is a complete line of universal high flow EPA compliant, industry leading high performance catalytic converters that thrive in the harshest, high horsepower performance applications. We serve the heavy duty on-road market through our DPXFIT™ brand, which is a complete line of diesel particulate filters and diesel oxidation catalysts developed to cover light, medium and heavy-duty trucks. DPXFIT™ products are designed and built to address the critical after treatment system requirements for all Tier-1 brands. All DPXFIT™ products meet or exceed OEM requirements and to ensure optimal on road performance, our filters are catalyzed with platinum group metals from inlet to outlet and always new, and never re-manufactured. Lastly, we are heavily involved in supplying the industrial industry and retrofit many engines to not only produce their own power, but also back up power for emergency situations. With expertise in project solutions, we can custom engineer an after-treatment/emissions system for any application, to meet any emission requirement.

GESi® Mission

Design, Engineer, Manufacture, Sell, and Support, emissions technologies by exceeding the expectations of our partners and our industry.

Be sure to check us out on all the below websites and social media pages to always keep up on what we are doing next!

LIGHT DUTY

BETTER PERFORMANCE | BETTER SERVICEABILITY

- Greatest application coverage available in the aftermarket
- Larger filters resulting in reduced back pressure in certain applications
- Serviceable units available with included V-band clamps for ongoing maintenance & cleanings
- Stainless steel construction, yet lighter weight than OEM

DID YOU KNOW? AFTERTREATMENT...

The diesel emission system is quite simple but the failures that occur upstream are more complicated. It is critical that ALL fuel, air, turbo, cooling & oil components are kept in optimum operating condition at all times to avoid issues with the emission system parts. Using inferior engine oil that doesn't comply with the latest standards for diesel engines and failing to comply with OE service and preventative maintenance recommendations will lead to increased cost long-term and ultimately downtime.

DID YOU KNOW? FINAL MILE...

Frequent stop/start and high idle vehicles (final mile delivery, waste pick-up and transit & school bus applications) means more attention to the emission control system is necessary. Typically, exhaust temperatures do not reach the required temperature for a passive regeneration during normal operation so parked manual regeneration intervals will increase. Additional DPF & DOC cleanings will also be needed over the life of the vehicle to keep the system performing as designed in these more challenging environments.

PERFORMANCE IS IN OUR DNA

Some may recognize our founder, Eric Latino, as a record-breaking NHRA driver, but since 2001 Eric and Global Emissions Systems Inc. (GESi®) have been focused on supplying the OEM and aftermarket with industry leading emissions control components with quality and performance at top of mind.
